IN THE CLAIMS

Please amend the claims as follows:

- 1-80. (canceled)
81. (currently amended) An apparatus for delivering voltage pulses to tissue so as to establish an electric field sufficient to assist the topical introduction of a therapeutic agent into a cell of a tissue, wherein the apparatus comprises:
  - a) a detachable electrode support member having disposed thereon (one) or more opposing pairs of electrodes arranged relative to one another to form an electrode array, and further comprising an electrode cover and a cosmetic reservoir disposed between the electrode cover and electrode array, wherein the cosmetic reservoir is in fluid communication with the electrode array; and
  - b) a power supply in electrical communication with the pair(s) of electrodes disposed in the support member, wherein the power supply provides voltage pulses to at least a pair of the electrodes to effect electroporation.
82. (original) The apparatus according to claim 81, wherein said apparatus is configured to be hand-held.
- 83-87. (canceled)
88. (original) The apparatus according to claim 87, wherein said reservoir comprises a porous reservoir.
